

University of Bahrain  
College of IT  
Department of Computer Science  
ITSE476 - Free and Open Source Software Development

Assignment One

Research a topic related to open source software development such as tools, methodologies, processes and/or case studies. You are then required to prepare a 10-minute presentation and a written report (few pages) about the topics.

Possible Report Content:

- Title Page
- Introduction
- Background Information
- Tool/Method/Process Description and Usage
- Merits and Drawbacks (or Comparison with Others)
- Conclusion
- References
